

INNOVATIVE DESIGNS: PRECI-FLEX® MODULAR TOOLING SYSTEM

EXPAND THE CAPABILITIES AND EFFICIENCY OF YOUR DRIVEN TOOLS

Eppinger Driven Tools come standard enabled to utilize our exclusive Preci-Flex Modular Tooling System.

- **One Tool Holder, Many Tooling Options** – Modular tool outputs include collet, collet chuck, shrink fit, side-lock, face mill holder, stubby, and mini-nut, and allow for a greater range of machining operations.
- **Improves Rigidity** – Minimal projection increases rigidity to improve cutting tool performance and tool life.
- **Improves Productivity** – Preci-Flex adapters can be preset offline, and adapters can be changed quickly with the holder still in the turret increasing machine up-time.

**TAPER & FACE CONTACT
INCREASES RIGIDITY**

- **Saves Time and Money** - Greater rigidity allows for more aggressive machining operations and higher metal removal rates.
